

CYPHERPUNK

Spofeai

Sport-finance-ai

PRESENTED BY

ZHANMADI

Problem

Traditional platforms (1XBET, etc.) are centralized:

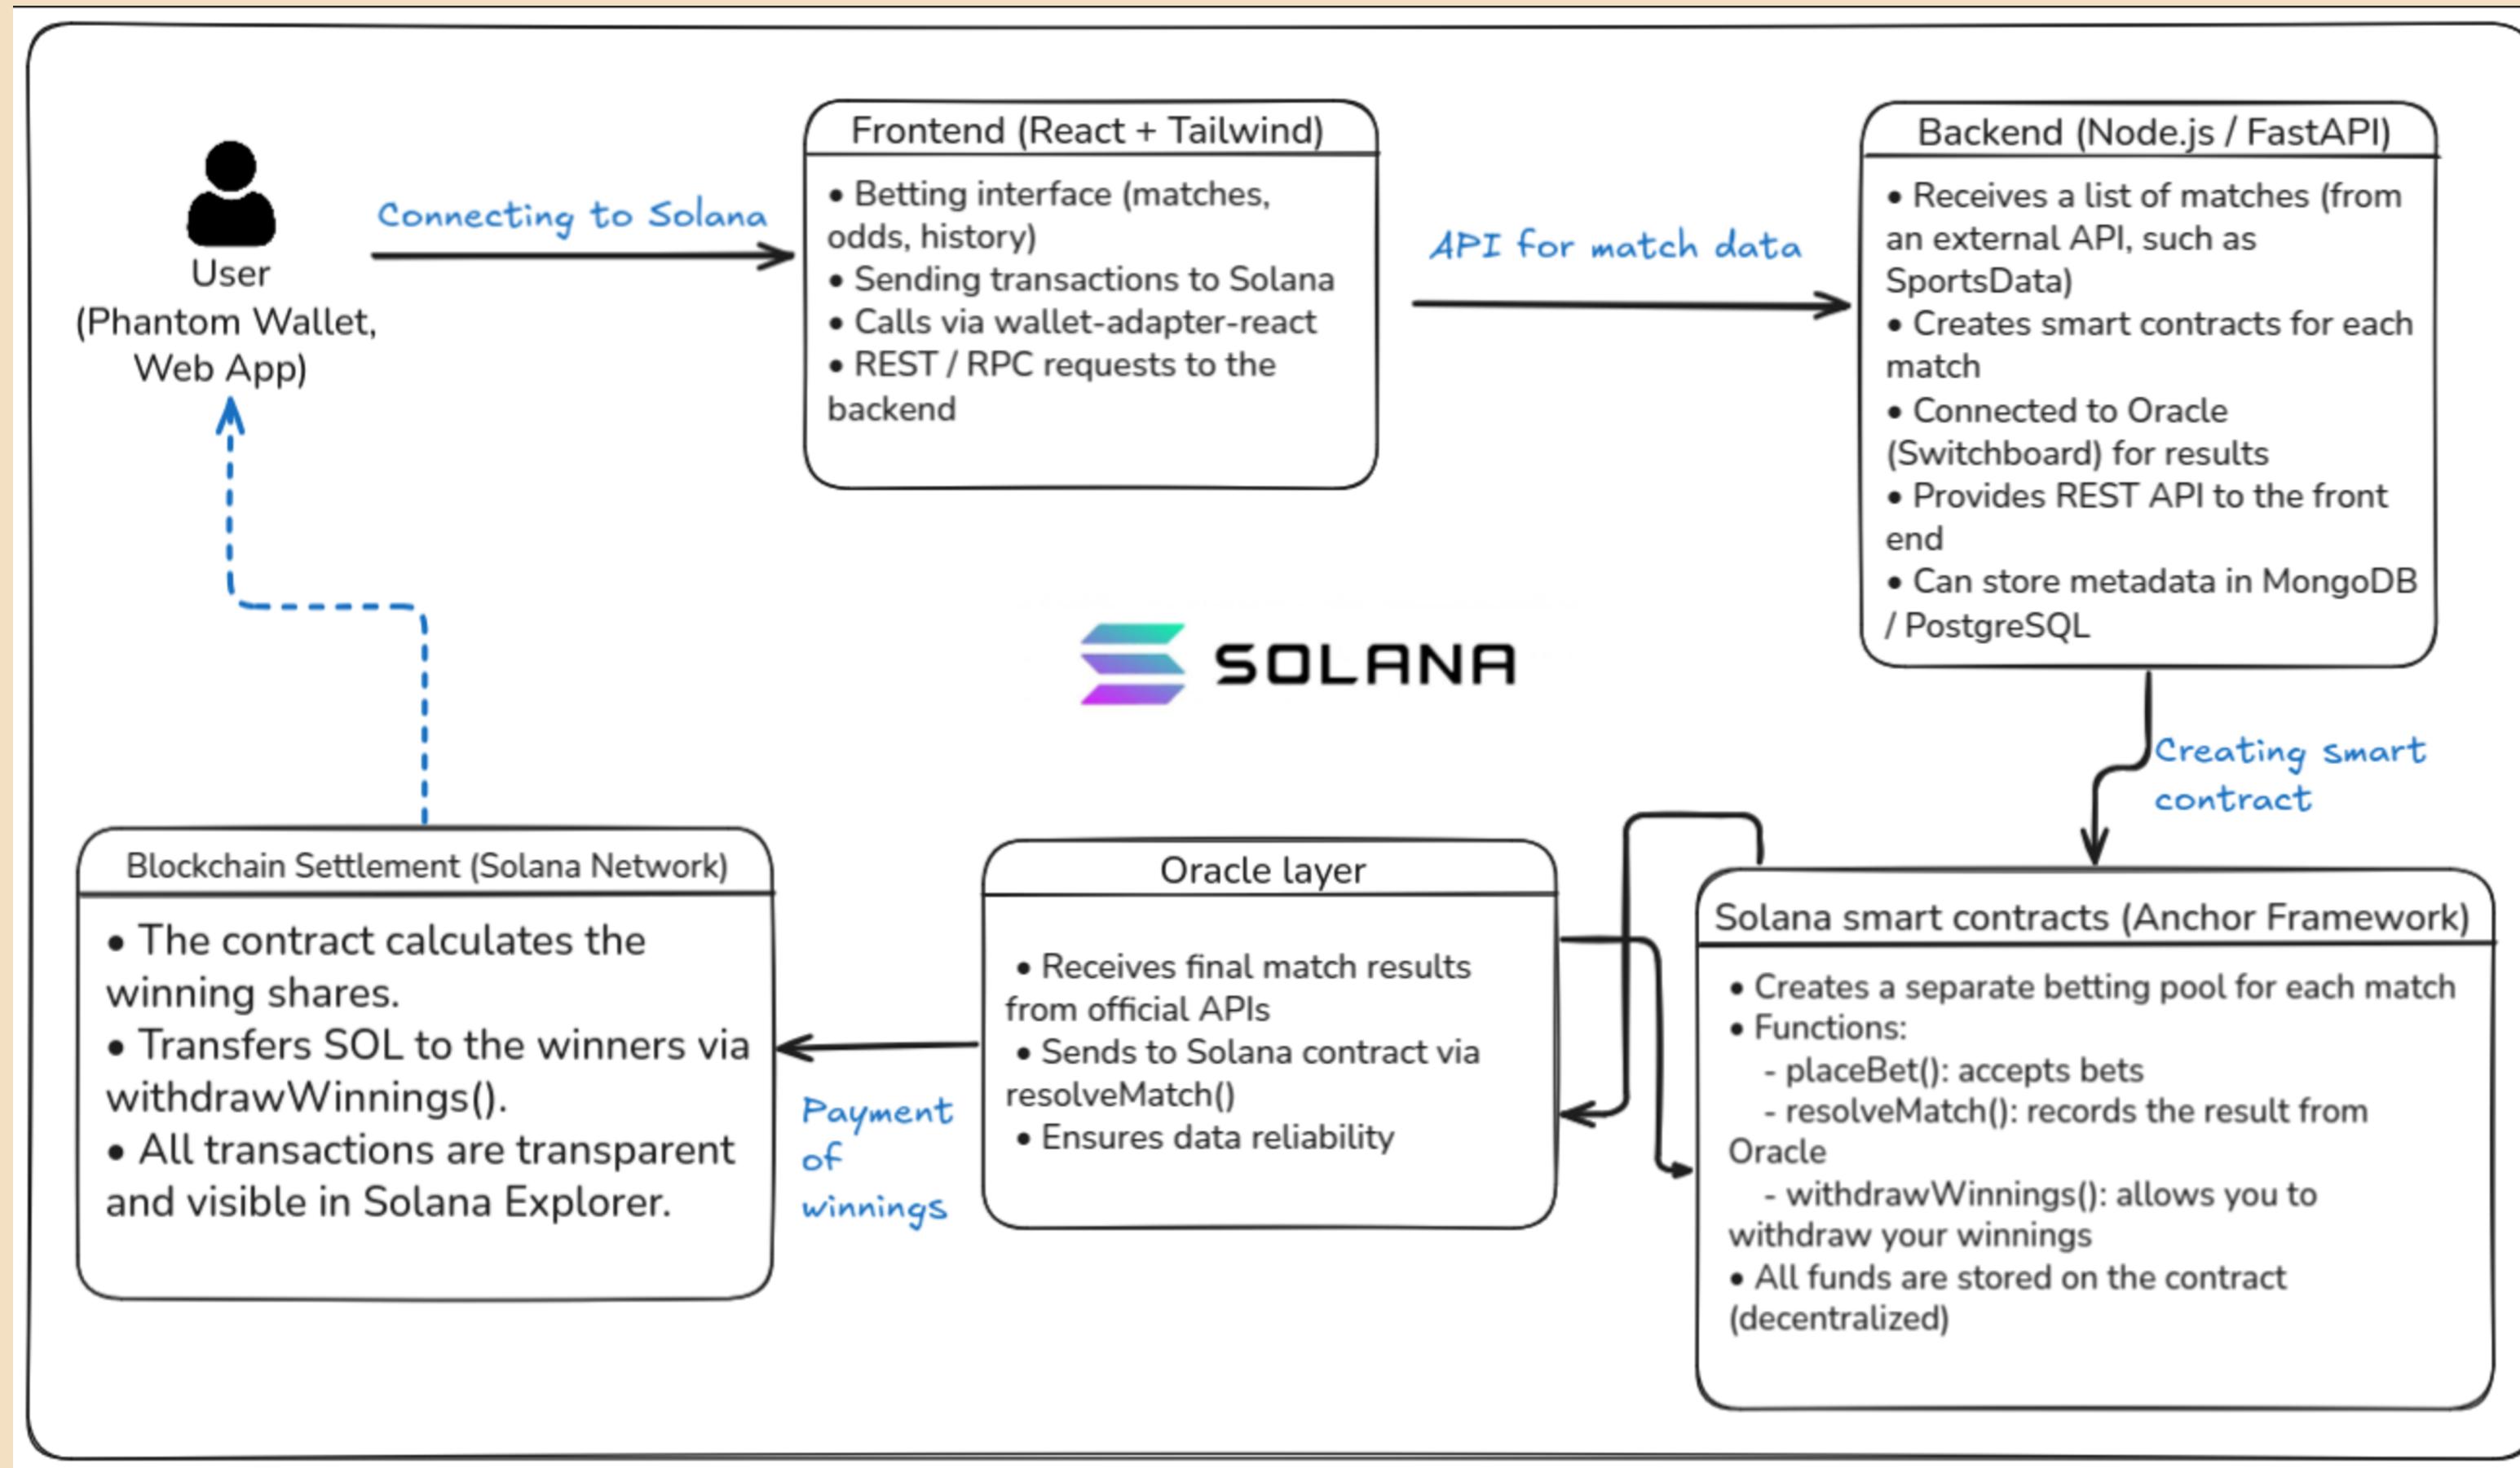

- Users do not control their funds
- Commissions and delays in payments
- No transparency: algorithms and odds are hidden
- Account blocking and unfair results are possible

Solution

Spofeai combines:

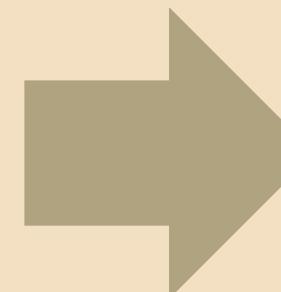

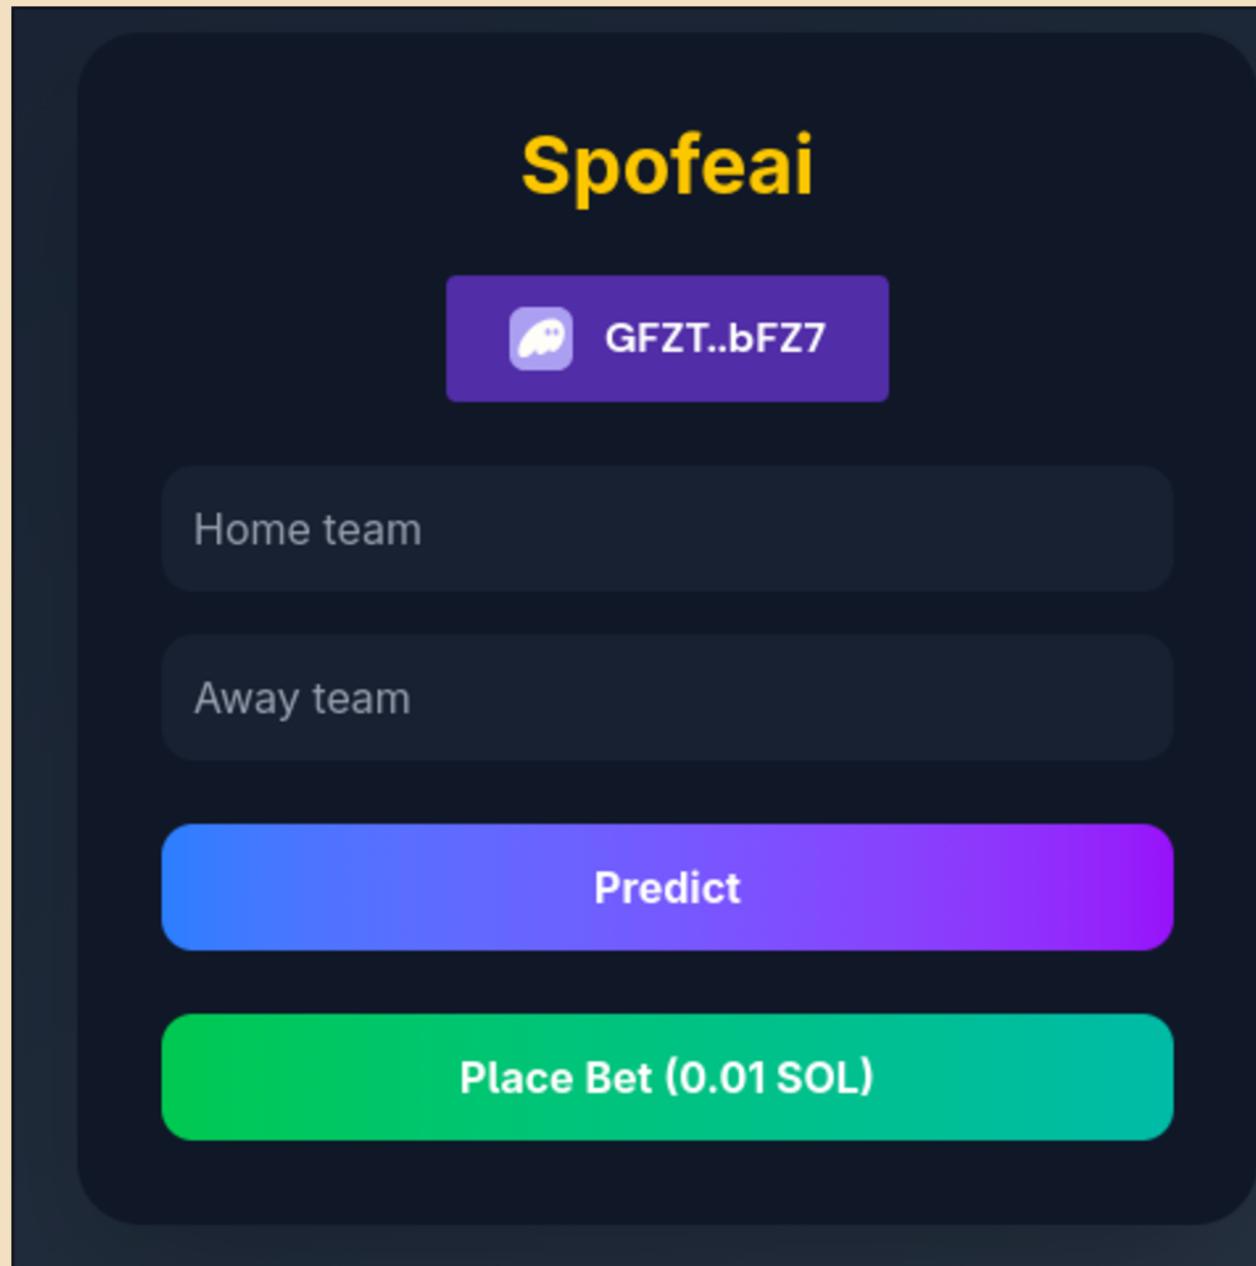

- On-chain betting on Solana with minimal fees
- Phantom Wallet for complete decentralization
- Transparent payouts and transaction history directly on the blockchain
- AI match predictions via ML model (FastAPI backend)

Architecture

MVP

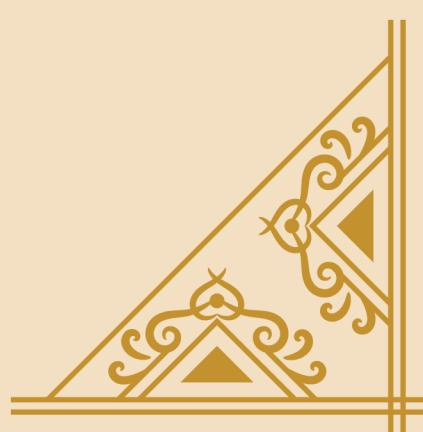

MVP implements basic functionality, demonstrating the key idea of the platform.

Italy. Serie A		
28 October		
Lecce	1	X
Napoli	2	
28/10 / 22:30 / Round 9	6.75	4.09
Home	1.606	
Away		
28/10 / 22:30 / 2 Matches / Round 9	3.495	5.19
Atalanta	1.676	
Milan		
29/10 / 00:45 / Round 9	2.712	3.48
Czech Republic. Chance Liga	2.784	
28 October		
AC Sparta Prague	1	X
Bohemians 1905 Prague	2	
28/10 / 21:00 / Round 13	1.33	5.2
		7.7

Planned

1. Switchboard Oracle Integration-automatic verification of match results
 2. P2P betting (pool-based) - users bet against each other
 3. NFT badges - rewards for the best forecasters
 4. Mobile app with native Solana SDK
 5. DAO management - users decide which matches to add
- 

The End of Presentation

Betting is bad.
It can be risky, unfair, and manipulative.
But ignoring it means turning a blind eye to reality.
People will always want to compete, test their intuition,
and emotions.

**It is impossible to eliminate betting, but we can make it
fair, safe, and transparent.**
